1. Offset soil acidity — help grass by applying bonus-benefit Scotts SOIL IMPROVER rich in soluble iron, magnesium and sulfur for extra sparkle.

2. Fertilize grass — urgent need for all lawns at this time. Grass left hungry is apt to lose its sparkle soon as hot weather arrives.

3. Sow grass seed — as early as soil can be worked. Choose Scotts brand that makes the lawn that suits your needs.

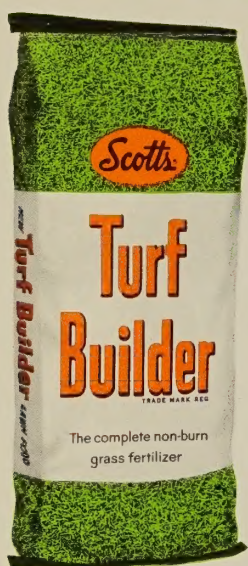

Good soil or poor, spread TURF BUILDER when you sow seed. It insures quicker sod and stronger roots.

4. Stop the bugs — Spread COPE where Ants are active. Also effective for grub-proofing lawns in areas bothered by turf-destroying grubs.

When you get rid of grubs and similar soil insects, marauders like skunks and moles go elsewhere in search of food.

5. Mow as soon as anything to cut — avoid bleached-out, spindly grass that follows if you allow lawn to grow too tall before its first cut.

Use a sharp mower to keep from bruising leaf tips and dulling lawn color.

This modern *complete* fertilizer revolutionizes feeding of all your turf areas. A single bag richly nourishes 5,000 square feet yet weighs an easy 22 pounds — not the customary 100 pounds. Think of the labor and time you save in handling! . . . less weight and bulk to wrestle! These all mean dollars to you—dollars which TURF BUILDER saves for you.

No extra mowing . . .
TURF BUILDER gives steady feeding, healthy color, strong roots without the surge growth common fertilizers produce.

No burning
TURF BUILDER has built-in safety. Inexperienced help can apply it without danger of burning. No need to water in!

No odor
TURF BUILDER is absolutely odorless before, during and after application. Visitors or neighbors have no cause to complain.
